C5F - COBIT 5 Foundation

Overview

Course Code		C5F	Duration		3.0 days

COBIT 5 helps enterprises maximize the value of their information – the currency of the 21st century. Through its 16-year history, COBIT has been used by enterprises around the world to improve management of enterprise IT and governance. COBIT 5 provides globally accepted principles, practices, analytical tools and models designed to help business and IT leaders maximize trust in, and value from, their enterprise's information and technology assets. COBIT 5 provides guidance to executives and those charged with making decisions concerning the use of technology in support of organizational objectives. This framework helps business leaders address the needs of all stakeholders across the enterprise and ultimately maximize the value from information and technology.

COBIT 5 integrates established ISACA risk and value management frameworks into an established governance framework provided for in earlier versions of COBIT.

This course is a 3-day classroom training that enables IT and business professionals to learn what COBIT 5 is and how it can be used to add value to their enterprises. At the end of the 3-day classroom training, the certification exam may be taken.

The COBIT 5 Foundation certificate is awarded to candidates passing the examination. Participants will also earn 21 Project Management Institute (PMI) Professional Development Units upon course completion.
